**NOTES TO THE FINANCIAL STATEMENTS**

**APRIL 2008**

**(all amounts are expressed in million LEK, unless otherwise stated)**

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(e) Financial assets**

All the financial assets are initially measured at fair value of the consideration given plus, transaction costs that are directly attributable to the acquisition of the financial asset.

Financial assets are classified as follows:

**Loans originated by Bank**

Loans are financial assets with fixed or determinable payments that are not quoted in an active market and created by Bank providing money to a debtor. Loans comprise loans to employees.

At subsequent reporting dates they are carried at amortized cost, less any impairment loss recognized to reflect irrecoverable amounts.

**Held-to-maturity**

Investments held to maturity are financial assets with fixed or determinable payments and fixed maturities that the Bank has the positive intent and ability to hold to maturity.

Held to maturity investments are recognized on a settlement date basis and are initially measured at cost. At subsequent reporting dates they are carried at amortized cost, less any impairment loss recognized to reflect irrecoverable amounts.

**Available for sale investments**

Available for sale investments are recognized on a settlement date basis and, after initial recognition, are reflected in the financial statements at fair value. Gains and losses arising from changes in fair value are recognized directly in equity in the investments revaluation reserve with the exception of impairment losses. Where the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously recognized in the investments revaluation reserve is included in profit or loss for the period.

**BANK OF ALBANIA****NOTES TO THE FINANCIAL STATEMENTS****APRIL 2008****(all amounts are expressed in million LEK, unless otherwise stated)****2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)****(e) Financial assets (continued)****Financial assets at fair value through profit or loss**

This category comprises financial assets classified as held for trading are those that the Bank maintains for short term profits. Those are recognized and derecognized on a trade date where the purchase or sale of an investment is under a contract whose terms require delivery of the investment within the timeframe established by the market concerned, and are initially measured at fair value. Any realized loss/profit in the fair value is directly recorded in the income statement

**Fair values**

For investments traded in organized financial markets, fair value is determined by reference to stock exchange quoted market bid prices at the close of business on the balance sheet date.

For investments where there is no quoted market price, a reasonable estimate of the fair value is determined by reference to the current market value of another instrument, which is substantially the same.

**Impairment and uncollectability of financial assets**

Financial assets, other than those "Held for trade", are assessed for indicators of impairment at each balance sheet date. Financial assets are impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been impacted. For financial assets carried at amortized cost, the amount of the impairment is the difference between the asset's carrying amount and the present value of estimated future cash flows, as follows:

- For loans originated by Bank – the recoverable amount of originated loans is calculated based on the year-end evaluations of loans, including the accrued interest. In determining the recoverable amounts of loans to employees, management considers the particular factors, including the review of repayment history of the debt by its former employees. The provision for impairment losses on loans is reported in the income statement as a charge and is deducted from the relevant asset category on the balance sheet. When it is determined that a loan cannot be recovered, all the necessary legal procedures have been completed and the final loss has been determined, the loan is written off;
- For financial assets held to maturity – the carrying amount of the asset is reduced to its estimated recoverable amount either directly or through the use of an allowance account and the amount of the loss is included in the statement of profit and loss; and
- For financial assets available for sale –when a decline in the fair value of an available-for-sale financial asset has been recognized directly in equity and there is objective evidence that the asset is impaired, the cumulative loss that had been recognized directly in equity shall be removed from equity and recognized in profit or loss even though the financial asset is owned by the Bank again.

**NOTES TO THE FINANCIAL STATEMENTS**

**APRIL 2008**

**(all amounts are expressed in million LEK, unless otherwise stated)**

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(f) Repurchase agreements and reverse repurchasing agreements**

Securities purchased under agreements to resell (reverse repurchase agreements) and securities sold under agreements to repurchase (repurchase agreements) are generally treated as collateralised financing transactions and are carried at the amounts of cash advanced or received, plus accrued interest.

Repurchase agreements are recorded in the balance sheet item "Due to domestic Banks". Based on the Bank's regulation on repurchase agreements, the Bank is not required to put up any collateral for these securities.

Interest earned on reverse repurchase agreements and interest incurred on repurchase agreements is recognized as interest income or interest expense, over the life of each agreement using the interest rate approved by the Supervisory Council of the Bank of Albania.

**(g) Fixed assets**

The fixed assets are stated at historical cost less accumulated depreciation except the bank's building, which are stated at revaluated amount, which is calculated using the replacement cost method. (See Note 10). Any revaluation increase arising on the revaluation of the head office building is credited in equity to the properties revaluation reserve, except to the extent that it reverses a revaluation decrease for the same asset previously recognized in profit or loss, in which case the increase is credited to profit or loss to the extent of the decrease previously charged. A decrease in the carrying amount arising on the revaluation of such land and buildings is charged to profit or loss to the extent that it exceeds the balance, if any, held in the properties revaluation reserve relating to a previous revaluation of that asset.

If the fair value of a fixed asset is lower than its carrying amount, due to circumstances not considered to be temporary, the fixed asset is written down to its fair value.

Gains and losses on disposal (sell or out of use) of fixed assets are determined as the difference between net disposal proceeds and the carrying amount of the asset and are recognized as income or expense in the statement of income and expenditure in the year of disposal.

Depreciation is provided on all fixed assets based on the historic cost except for the headquarter building, which is stated at revaluated amount. The annual charge for depreciation is computed using the straight-line method, using rates specified for each depreciable asset based on estimated useful lives. The estimated useful lives applied during 2008 are the same as year 2007:

	<b>2008</b>
Building – Head office	40 years
Buildings – At branches	25 years
Vehicles	5–10 years
Furniture, fixtures and equipment	3–20 years
Computer software	2 years

**BANK OF ALBANIA**

**NOTES TO THE FINANCIAL STATEMENTS**

---

**APRIL 2008**

**(all amounts are expressed in million LEK, unless otherwise stated)**

The key elements of price risk affecting the Bank are:

- currency risk associated with fluctuations in the fair value of financial instruments due to changes in foreign exchange rates; and
- interest rate risk associated with fluctuations in the fair value of financial instruments due to changes in market interest rates.

The Bank's exposure to currency risk is monitored on a continual basis by the Monetary Operations Department. Financial assets denominated in foreign currencies are disclosed in each relevant note to the financial statements.

The Monetary Operations Department of the Bank monitors interest rate risk. The Bank mitigates such risks by maintaining a significant excess of interest bearing assets over liabilities. The Bank maintains a portfolio of interest bearing financial assets and liabilities such that the generated net interest income is significantly in excess of operating requirements, which minimizes the potential adverse effects of interest rate fluctuations. Interest rates applicable to financial assets and liabilities are disclosed in each relevant note to the financial statements.
